

Kung 1999-0304

IN THE CLAIMS:

1. *(currently amended)* A method of logging using information related to communication activity in an integrated broadband communication system, comprising the steps of:

creating an activity log for a user's system address that logs data associated with one of an incoming and outgoing communications of more than one type of media including telephone, text data, and multimedia video and audio, the logged data including the directory number of the incoming/outgoing communication and billing information associated therewith;

determining if there is said one of an incoming and outgoing communication for a user's system address; and

creating a new record for said activity log if there is a said one of an incoming and outgoing communication, said new record comprising data associated with one of an incoming and outgoing communications including the directory number of the incoming/outgoing communication and billing information associated therewith.

2. *cancelled*

3. *(currently amended)* The method of claim 2 1, further comprising the steps of:
determining if there is a connection identifier for said one of an incoming and outgoing communication for a user's system address; and

entering said connection identifier into said new record if there is one of said connection identifier for said one of an incoming and outgoing communication.

4. *(original)* The method according to claim 3, further comprising the steps of:
determining if there is supplemental information available for said connection identifier; and

entering said supplemental information into said new record if said supplemental information is available.

Kung 1999-0304

5. *(original)* The method of claim 4, further comprising the steps of:
determining if there is billing information available for said one of an incoming
and outgoing communication; and
entering said billing information into said new record if there is billing
information available for said one of an incoming and outgoing communication.

6. *(original)* The method according to claim 5, further comprising the step of:
closing and saving said new record in said activity log.

7. *(original)* The method according to claim 6, further comprising the step of:
providing a graphical user interface for accessing said activity log to said user.

8. *(original)* The method according to claim 6, further comprising the step of:
enabling said user to initiate a new communications session by access and
selecting said saved record from said activity log using a telephone.

9. — 70 *cancelled*
